

Internship Positions Available

Granada Farms is currently seeking two individuals interested in a paid internship as a breeding technician for the 2022 breeding season. The internship is from January 10th-May. Applications will be accepted through October 30th.

Granada Farms is an equine breeding facility involved in the quarter horse racing industry. We also work with a number of other breeds and registries. Throughout this internship you will gain hands on experience in the following areas: stallion collection, insemination of mares, post breeding treatments, routine veterinary work for mares and foals, and various other duties that arise. The individual will also be exposed to the application of embryo transfer. Opportunities for research exist if a paper is required by your school for fulfilling the terms of your internship.

Applicants should have completed a reproduction class and should have a desire to learn and be willing to work six days a week from 8-5. You must have your own transportation and living arrangements. Please submit a resume and cover letter telling us a little bit about you and why you are interested in the reproduction internship.

Applications may be faxed to (979)828-5902 or please email them to granadafarms@granadafaarms.com
